*Debbie hasn't finalized this yet. She is performing the more difficult task right now of answering the media questions*

The fire watch period is expected to end this afternoon. The county's fire suppression contractor continued to cool down hot spots on the property. EPA will continue air monitoring until approximately 8 pm this evening. Particulate data will be updated on the [response.epa.gov](http://response.epa.gov) website. AreaRae data will be formatted for HQ approval to post on the [response.epa.gov](http://response.epa.gov) website.

Air sampling is planned for tomorrow to determine the air quality now that the fire is out. EPA has amended the sampling locations to target sensitive populations.

Area schools were reopened yesterday. Air monitoring results indicated the average total particulates were in the "GOOD" range according to the Air Quality Index ranges.

EPA will assist local responders with equipment inspections to determine if equipment is contaminated from firefighting activities.

ATSDR and the WV Division of Health and Human Resources have contacted the Wood County Health Department with an offer to perform Assessment Chemical Exposure Surveys. The decision whether or not to accept this offer will be discussed among Wood County Officials and responders.

The owner of the property has not yet notified WVDEP that they have secured a cleanup contractor. The order issued to the company by WVDEP requires this information within 10 days. The company was also ordered to implement immediate security measures by tomorrow.
